

PRAVESH MALVI, Frontend Developer (React Js)

+91-9009503504 | praveshmalvi009@gmail.com | <https://www.linkedin.com/in/pravesh-malvi>

CAREER SUMMARY:

Solution-driven developer with 2.3 years of experience crafting and optimizing web applications by ensuring maximum code reusability and minimal redundancy. Passionate about tackling challenges to deliver user-focused solutions using React.js and Next.js.

WORK EXPERIENCE:

Scubeelate Technologies Private Limited | Bangalore, India

Frontend Developer | 26 September, 2022 - Present

- Converted design mockups into responsive and efficient UI components, creating adaptable user interfaces with React.js and Next.js for consistent performance across devices.
- Skilled in connecting UI components with backend APIs, enabling smooth data flow and robust functionality.
- Utilized Redux Toolkit for efficient state management, boosting scalability, maintainability, and application performance.
- Built multiple admin panels and websites, integrating RESTful APIs while implementing advanced accessibility layers and custom modules to enhance security and user experience based on login credentials.

RELEVANT PROJECTS:

Zaincare : In-Home Healthcare Services Website and CMS

- Developed a comprehensive health checkup service in the Zain Care project, enabling seamless blood collection at home and report delivery.
- Designed a scalable architecture with Redux Toolkit for state management, ensuring smooth data flow and real-time updates.
- Emphasized accessibility and responsiveness by utilizing MUI (Material-UI) components and best practices.
- Optimized layouts and interactions to meet accessibility standards, ensuring a seamless user experience across diverse devices and screen sizes.

Stack: React Js, Redux Toolkit, Tailwind CSS, MUI, GSAP

Duration: 6 Months

Role: Frontend Developer

Duvet Ltd : Modern Home Textile & Garment products Website and CMS

- Developed a highly interactive web application with React Js, featuring intuitive user interface and smooth navigation.
- Implemented dynamic data fetching and state management using React Hooks, enhancing user interaction and application responsiveness.
- Utilized Tailwind CSS to create a visually appealing and responsive design system, optimizing the application's aesthetic appeal and performance.
- Designed and implemented reusable components and utility classes, ensuring a cohesive design language and streamlined development process.

Stack: React Js, Redux Toolkit, Tailwind CSS, MUI, GSAP

Duration: 5 Months

Role: Frontend Developer

LMNT : Gym Management - CMS

- In this LMNT Gym Management Application, we have developed engaging user interfaces and reusable components to streamline development and maintain a consistent look and feel across the application.
- Facilitated seamless integration between the user experience and backend, ensuring a cohesive and functional application.
- Enabled efficient management of memberships and sessions, including handling intricate aspects of PT and Couple PT sessions.
- Utilized state management libraries like Redux Toolkit to manage application state efficiently and ensure consistency.
- Implemented role based modules, ensuring a tailored experience for admins, front desk staff, GTs, and PTs, enhancing security and usability.

Stack: React Js, Redux Toolkit, Tailwind CSS, MUI

Duration: 3 Months

Role: Frontend Developer

EDUCATION:

2013 - 2016 | VVM College | Betul, MP, India
Bachelor of Science - Computer Science

SKILLS:

- | | | |
|--------------|----------------|-----------------|
| • HTML | • React Js | • Redux Toolkit |
| • CSS | • Next Js | • GSAP |
| • Javascript | • Tailwind CSS | • GITHUB |
| • Typescript | • SCSS | • Material UI |

CORE COMPETENCIES:

- | | |
|-------------------------------|------------------------------|
| • Responsive Development | • RESTful API's integration |
| • Cross-browser Compatibility | • Code Quality & Reusability |
| • Team Collaboration | • Performance Optimization |
